Primavera P5

“With Oracle’s Primavera P5 we were able to improve our internal communication processes and replace multiple spreadsheets with one easy-to-use database for all project-related information.” – Robert Perine, Constructability Review Engineer, Delaware Department of Transportation

Delaware Department of Transportation Replaces Spreadsheets with Single Project Management Solution

The Delaware Department of Transportation’s mission is to provide a safe, efficient, and environmentally sensitive transportation network that offers a variety of convenient and cost-effective choices for the movement of people and goods.

Challenges

- Deploy project management application that organizes workflow so that planned expenditures and project timelines are in line with revenue sources
- Eliminate various spreadsheets used for capital project management—improving communication and providing visibility all the way up the organization into past, current, and future projects

Solution

- Replaced 50 to 75 cumbersome spreadsheets for tracking capital projects by implementing Oracle’s Primavera P5 to house all past, current, and future project data—greatly enhancing information accuracy and timeliness
- Used Primavera to manage and provide visibility into approximately 16,000 projects—500 of which are active at any given time
- Improved internal communication processes by enabling managers to collectively examine resource and funding availability—allowing the organization to compile master schedules to meet project deadlines
- Improved rate of “on time” project delivery by 25 to 30%
- Eliminated unnecessary meetings by providing visibility into project changes and accelerated time required for change approvals from more than one month to just one or two days
- Enabled the Delaware Department of Transportation to cross-reference outstanding project issues, documents, and construction scheduling to make sure projects stay on schedule and within budget
- Provided visibility into projects up to a year in advance and pinpoint delivery dates quickly, improving its government performance grades and helping to secure additional funding
- Helped the department to improve productivity and manage more projects internally
